

Electronic Medical Records

Keep patient information safe and increase your efficiency.

Electronic medical records benefit you, your team and your patients. They capture your patients' holistic healthcare information in an accessible and secure manner.

Made for Patients

Electronic records keep patient information private and secure, while improving data accuracy and patient health outcomes.

Made for Staff

- Cut down on additional work, so your staff can spend more time caring for patients.
- No scheduling for on-site visits.
- Reduce burden for manual process of sending medical records.*
- No additional foot traffic or office disruptions.

Made for Providers

- Increase efficiency and timeliness of preauthorization approval and data collection.
- Improve provider and HEDIS rates by creating easy, seamless access to records.
- Advance information and educational opportunities for providers and patient care alike including gaps such as: colorectal and breast cancer screenings, chronic conditions.

**Initial medical record for prior authorization of outpatient and post-acute services will still be required for medical necessity.*

Implement EMR Access Today

Each office has tailored access with the ability to audit and monitor Health Alliance's access. The contract between the provider and Health Alliance means we're held to the same HIPAA standards as everyone in your office. Annual compliance and privacy training is given to all our staff members. Our Compliance department ensures that our staff always follows the strict privacy standards required by law when handling all member or provider information.

Call (800) 851-3379.
